

EAGLE ROCK, CA

MEMORY MAP

SKILL: MANIPULATING RASTER DATA

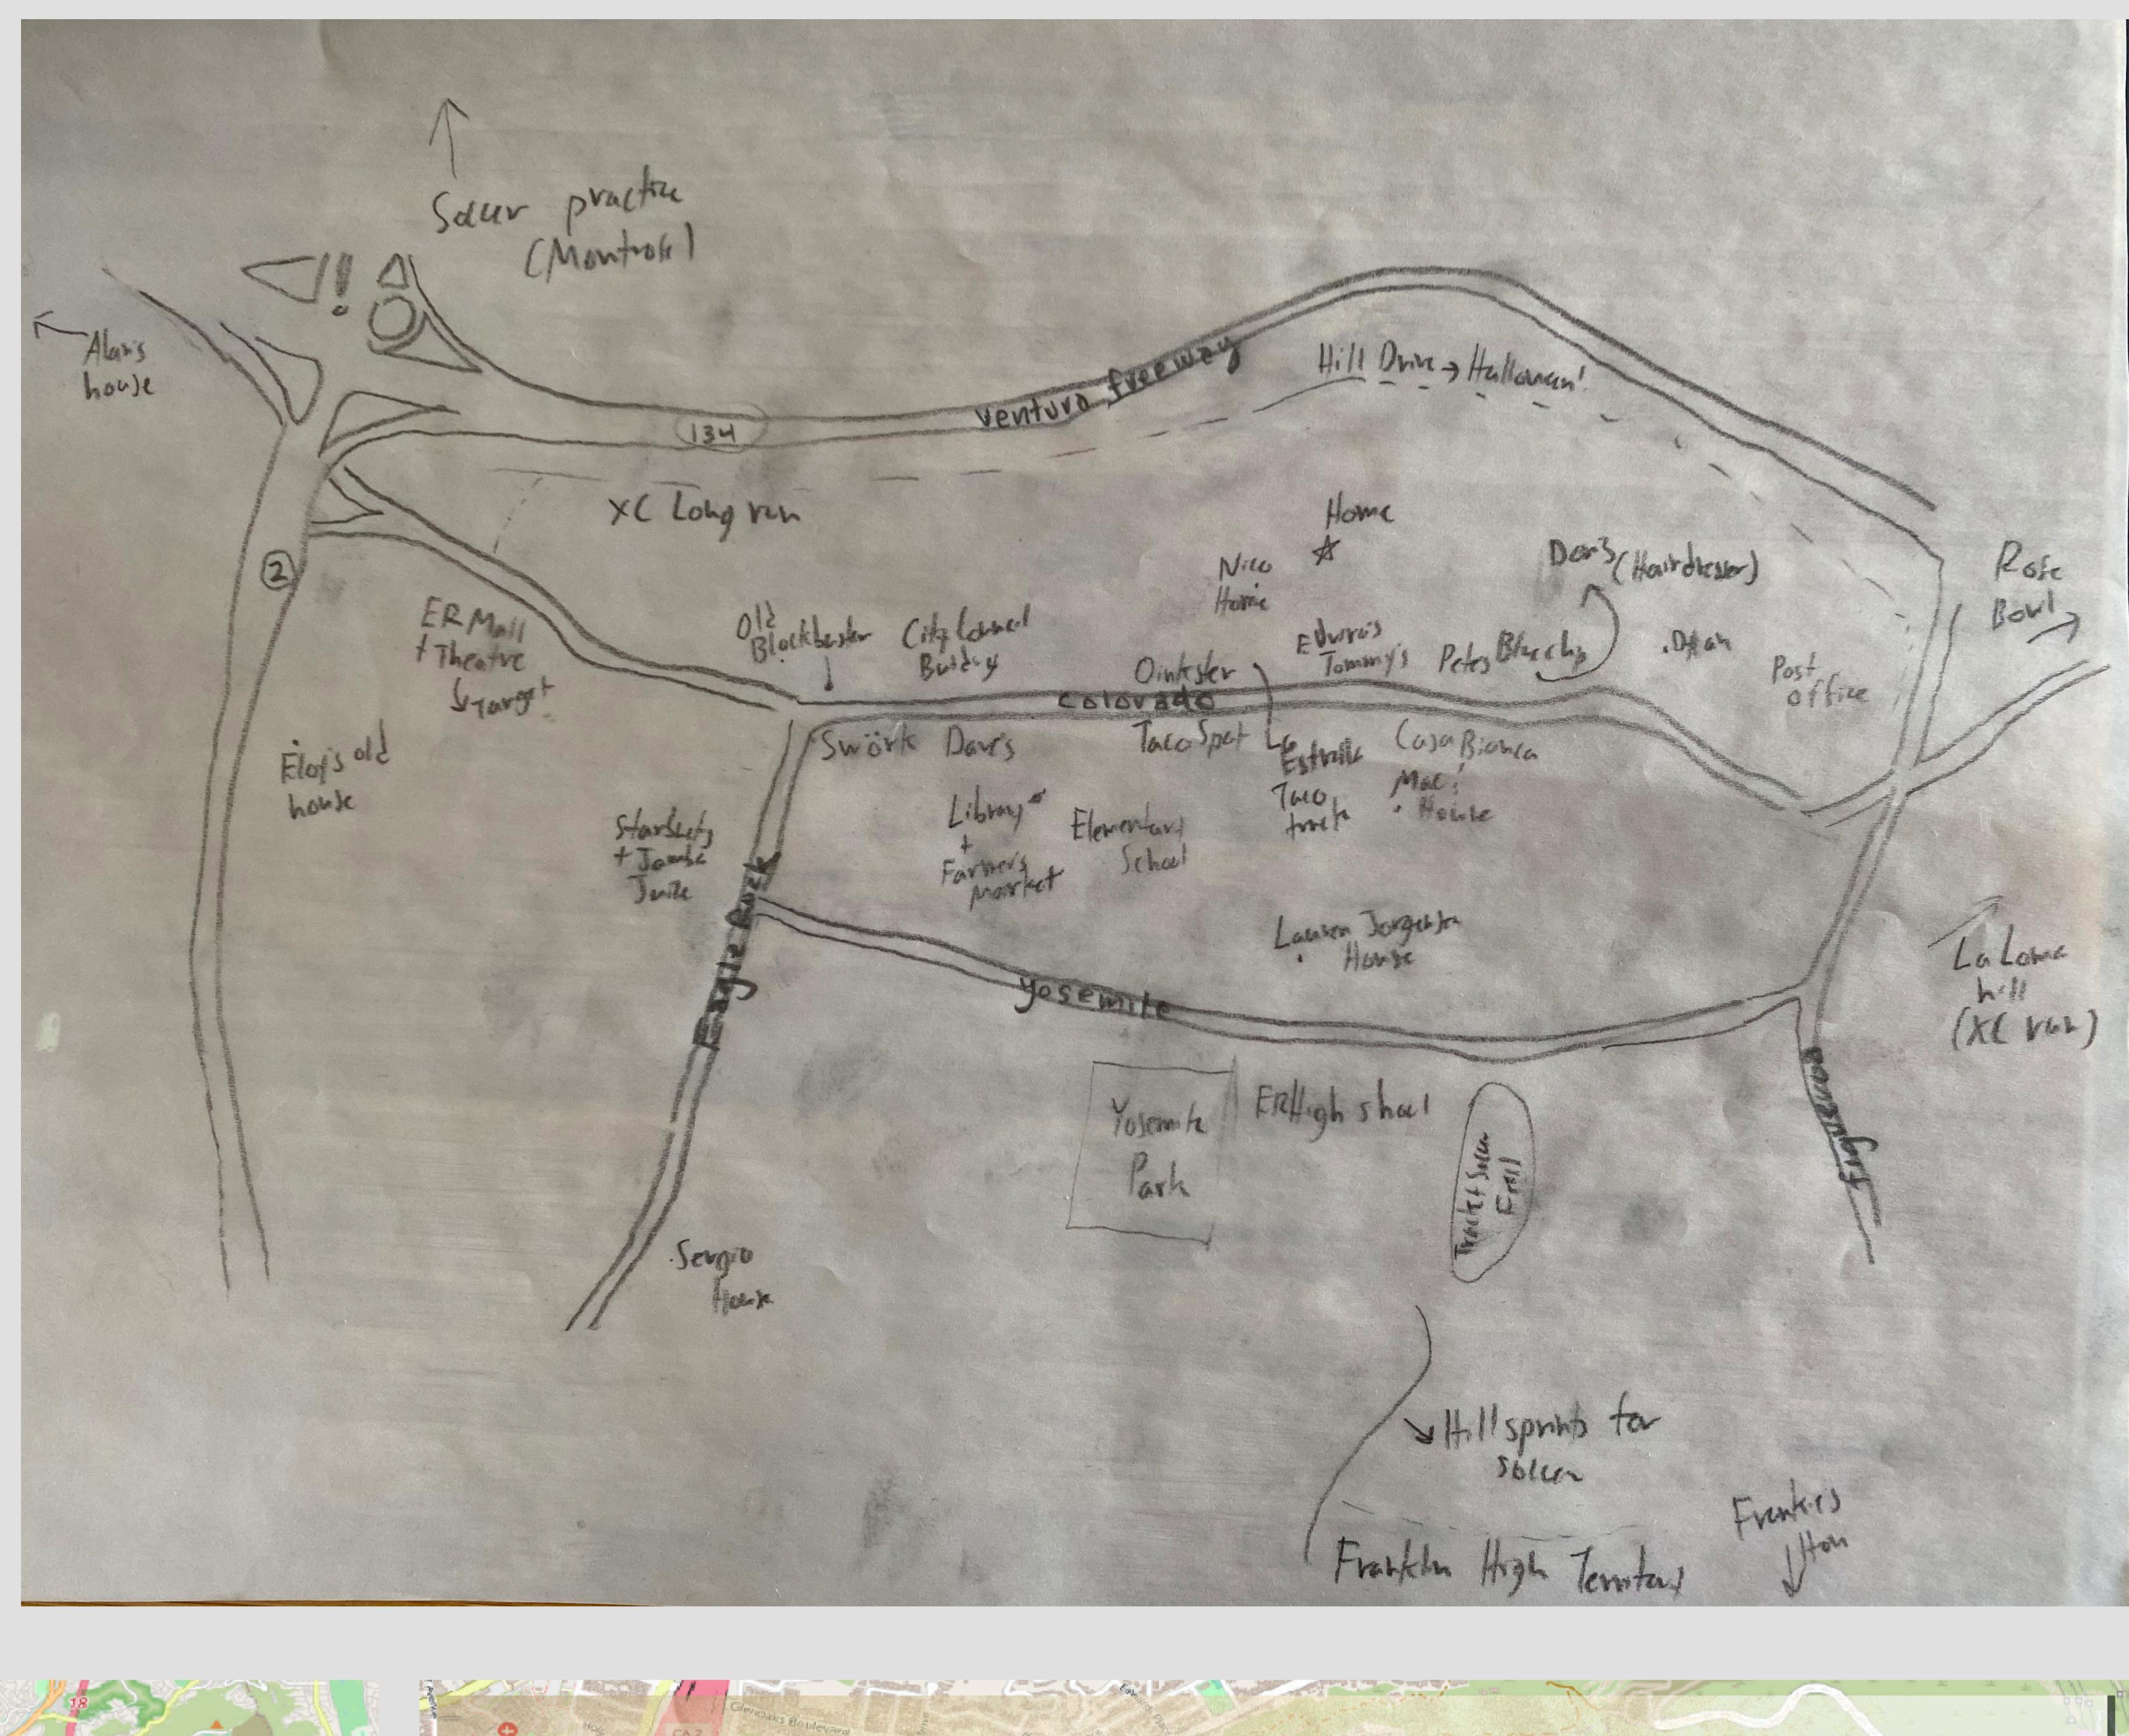

SOFTWARE USED: QGIS

I asked my partner to create a hand-drawn map of his childhood neighborhood in Eagle Rock, California, a part of northeast Los Angeles. His map shows many cherished spots from his memories growing up, including:

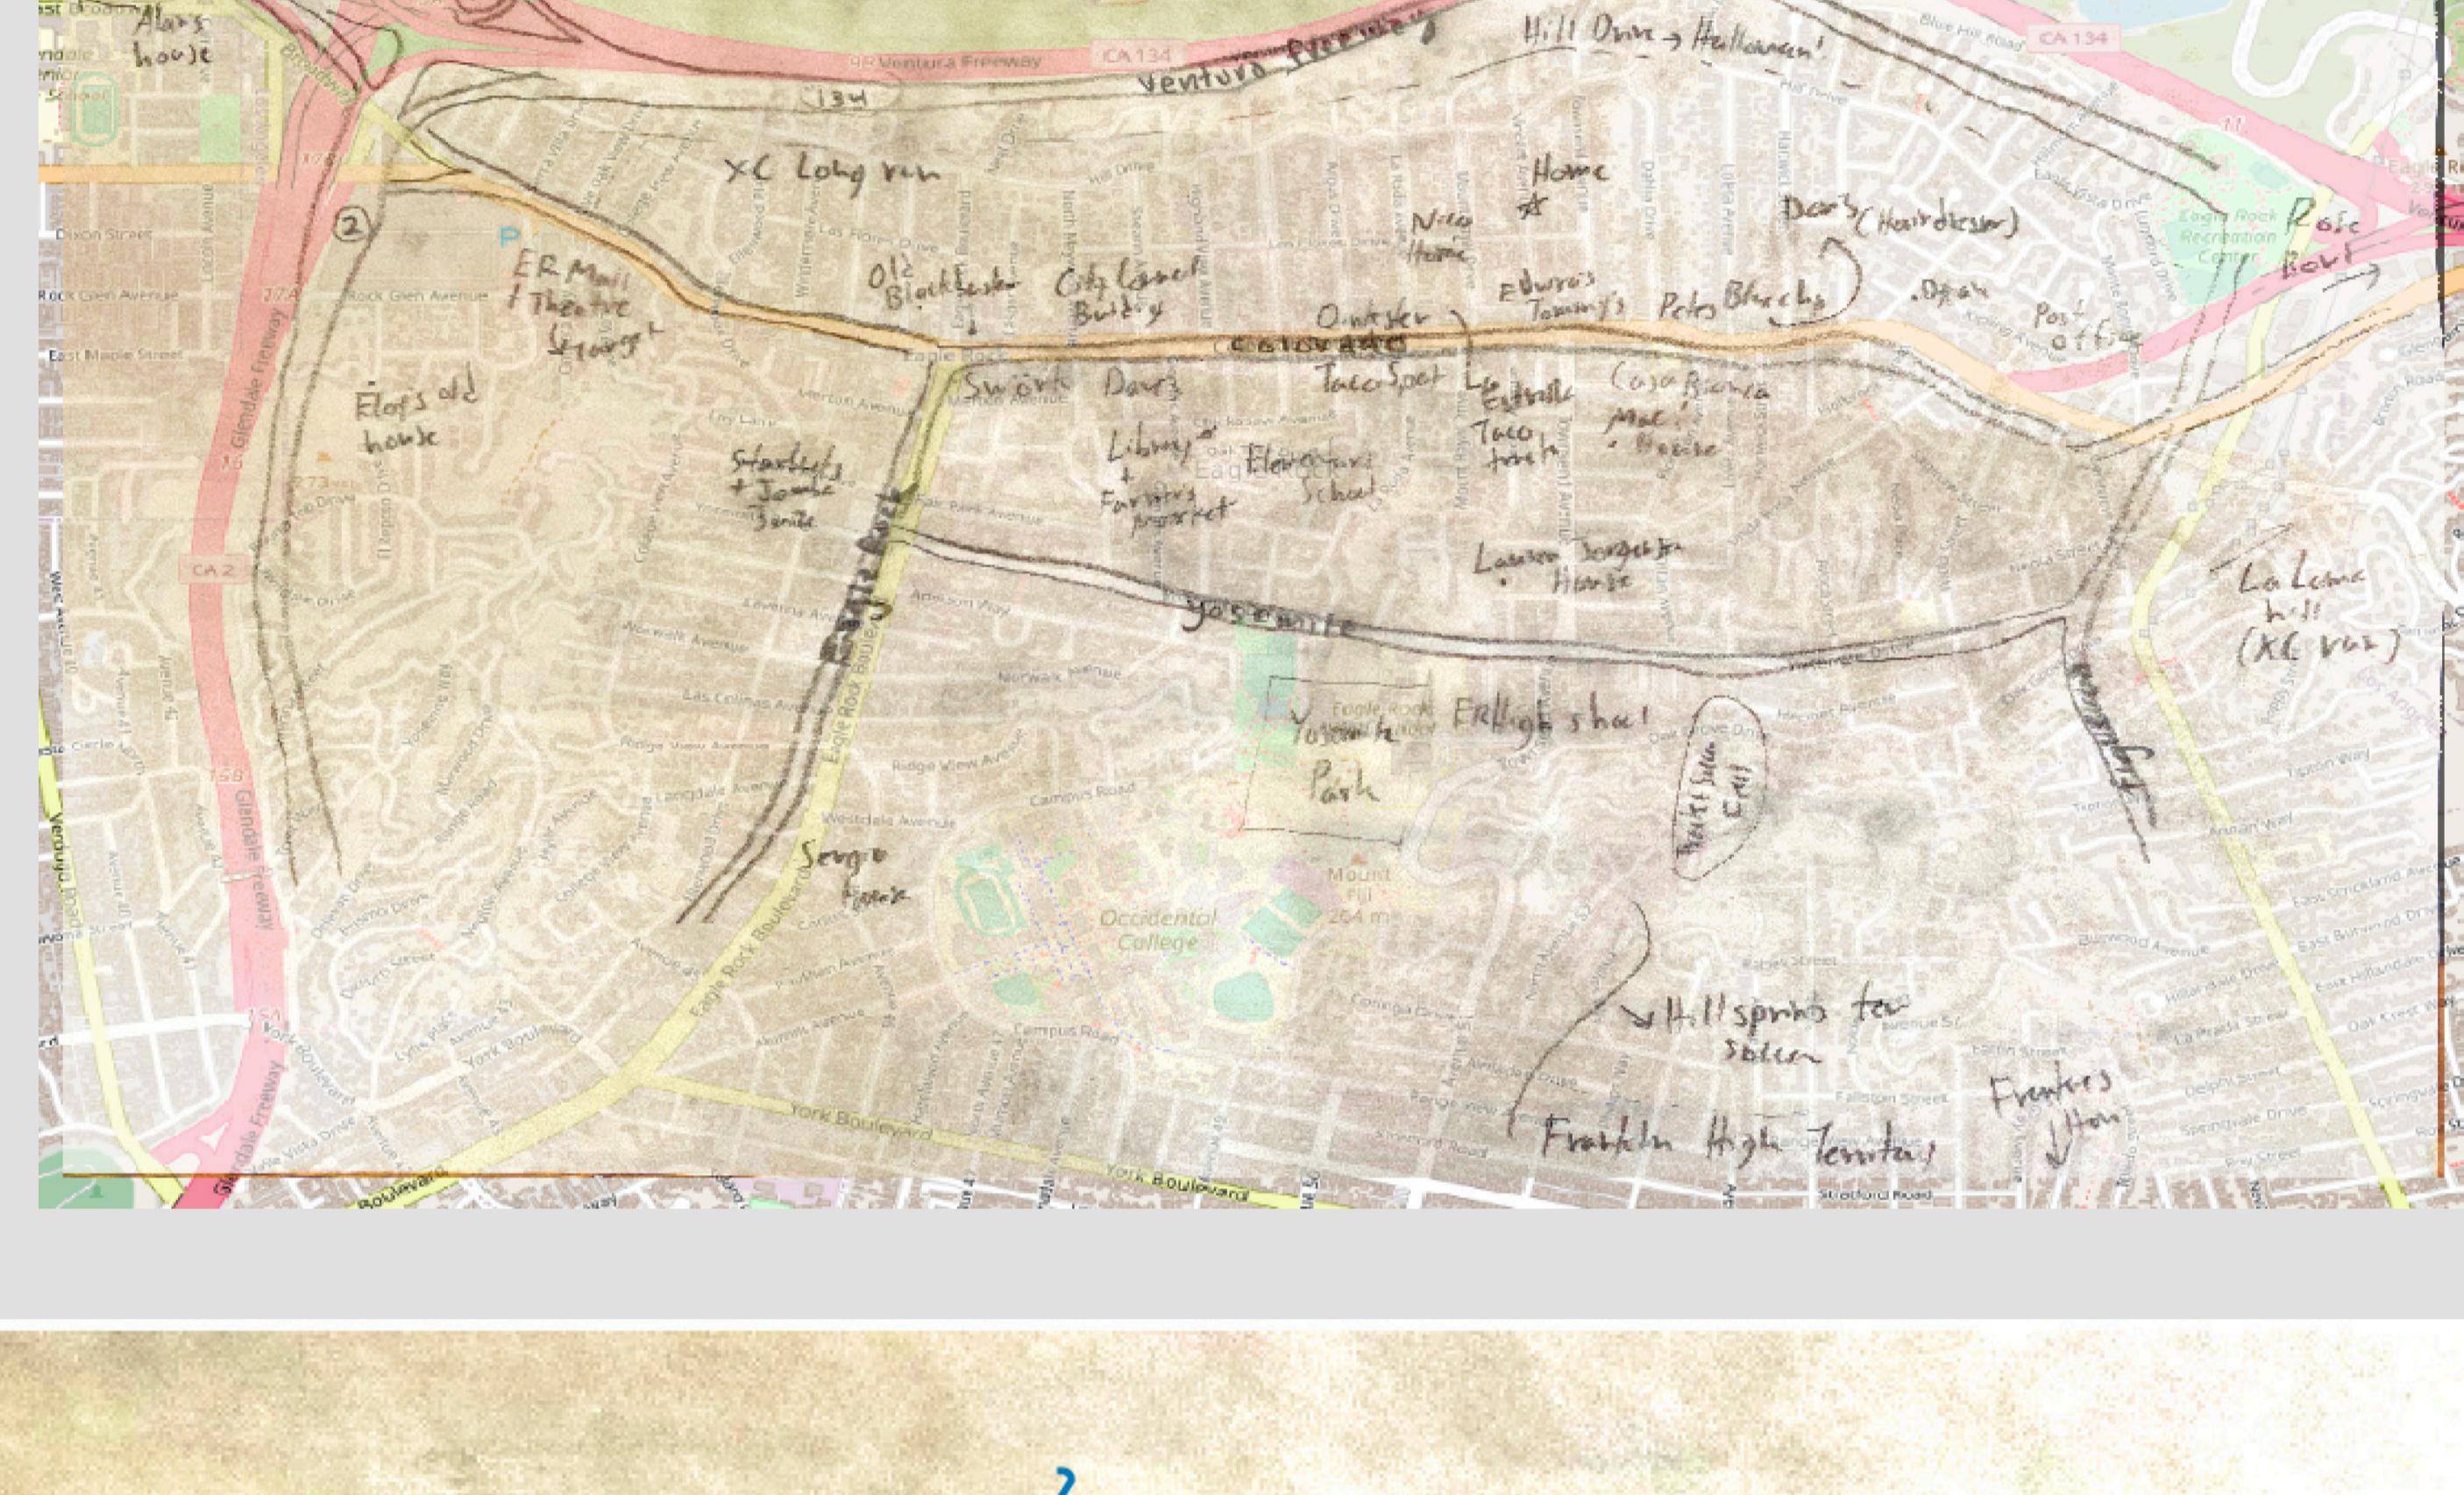

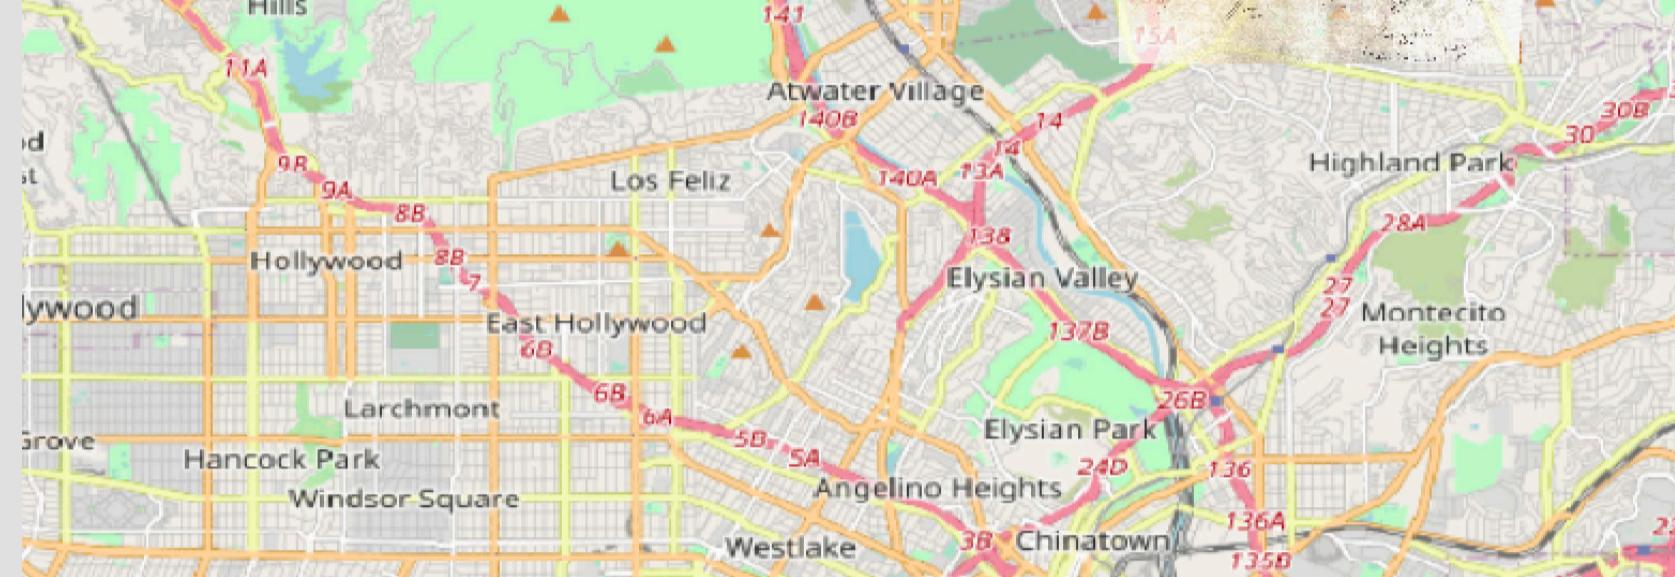

- his high school
- the locations of cross country and soccer practices
- his favorite pizza and taco joints
- his friend's old houses
- the best place to get Halloween candy in the neighborhood

My partner's family chose to live in Eagle Rock because of its relative affordability and walkability.

My source was LA City Open Data.
